

ASX / MEDIA ANNOUNCEMENT

5 July 2019

Desert Lion Energy Obtains Final Order Approving Plan of Arrangement

Lepidico Ltd (ASX:LPD) (“Lepidico” or “Company”) is pleased to advise that that Desert Lion Energy Inc. (TSXV: DLI) (“Desert Lion Energy”) has obtained a final order from the Ontario Superior Court of Justice (Commercial List) approving a statutory plan of arrangement (the “Arrangement”) under the Business Corporations Act (Ontario) pursuant to which a wholly owned subsidiary of Lepidico will acquire all of the outstanding common shares of Desert Lion Energy (the “Common Shares”).

Pursuant to the Arrangement, holders of Common Shares will receive 5.4 Lepidico shares for each Common Share held. Receipt of the final order follows the annual and special meeting of Desert Lion Energy holders of Common Shares held on Thursday, June 27, 2019 in Toronto, Canada, at which shareholders overwhelmingly approved the Arrangement.

The closing of the Arrangement remains subject to the satisfaction of various administrative conditions. It is expected that the Arrangement will be completed on or about July 10, 2019.

Management teams for Lepidico and Desert Lion Energy plan to travel to Namibia to ensure a smooth transition and commence exploration activities immediately following the closing.

About Lepidico Ltd

Lepidico Ltd is an ASX-listed Company focused on exploration, development and production of lithium chemicals. Lepidico owns the technology to a metallurgical process that has successfully produced lithium carbonate from non-conventional sources, specifically lithium-rich mica minerals including lepidolite and zinnwaldite. The L-Max[®] Process has the potential to complement the lithium market by adding low-cost lithium carbonate supply from alternative sources. More recently Lepidico has added LOH-Max[™] to its technology base, which produces lithium hydroxide from lithium sulphate without by-product sodium sulphate. The Company is currently conducting a Feasibility Study for a 5,000 tonne per annum Phase 1 lithium chemical plant, targeting commercial production for 2021. Work is currently being undertaken to evaluate the incorporation of LOH-Max[™] into the Phase 1 Plant Project flow sheet. Feed to the Phase 1 Plant is planned to be sourced from either the Alvarrões Lepidolite Mine in Portugal under an ore access agreement with owner-operator Grupo Mota (ASX announcement of 7 December 2017) or the Desert Lion Energy Lepidolite Project in Namibia (ASX Announcement 7 April 2019).

Lepidico's current exploration assets include a farm-in agreements with Venus Metals Corporation Limited (ASX:VMC) over the lithium mineral rights at the Youanmi Lithium Project in Western Australia. Lepidico also has a Letter of Intent with TSX listed Avalon Advanced Materials Inc. for planned lithium mica concentrate supply from its Separation Rapids Project in Ontario, Canada.

About Desert Lion Energy Inc.

Desert Lion Energy is a Toronto based emerging lithium development company focused on building Namibia's first large-scale lithium mine located near the town of Karibib approximately 210 km from the nation's capital of Windhoek and 220 km from the Port of Walvis Bay. The Company's Rubicon and Helikon mines, which have been mined intermittently for petalite and tantalum since the 1930's, are located within a prospective land package covering approximately 1,000 km². The project site is accessible year-round by road and has access to power, water, rail, port, airport and communication infrastructure. Desert Lion has delineated a Ni43-101 compliant Indicated and Inferred Mineral Resource estimate at Rubicon and Helikon of 8.8 Mt grading 0.56% Li₂O and 59ppm Ta₂O₅ (TSXV announcement of 12 October 2018).

Cautionary Note Regarding Forward-Looking Statements

This news release contains "forward-looking information" within the meaning of applicable securities laws. Generally, any statements that are not historical facts may contain forward-looking information, and forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget" "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or indicates that certain actions, events or results "may", "could", "would", "might" or "will be" taken, "occur" or "be achieved." Forward-looking information is based on certain factors and assumptions management believes to be reasonable at the time such statements are made, including but not limited to, continued exploration activities, lithium and other metal prices, the estimation of initial and sustaining capital requirements, the estimation of labour and production costs, the estimation of mineral reserves and resources, assumptions with respect to currency fluctuations, the timing and amount of future exploration and development expenditures, receipt of required regulatory approvals, the availability of necessary financing for the Project, permitting and such other assumptions and factors as set out herein.

Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking information, including but not limited to: risks related to changes in lithium prices; sources and cost of power and water for the Project; the estimation of initial capital requirements; the lack of historical operations; the estimation of labour and operating costs; general global markets and economic conditions; risks associated with exploration, development and operations of mineral deposits; the estimation of initial targeted mineral resource tonnage and grade for the Project; risks associated with uninsurable risks arising during the course of exploration, development and production; risks associated with currency fluctuations; environmental risks; competition faced in securing experienced personnel; access to adequate infrastructure to support exploration activities; risks associated with changes in the mining regulatory regime governing the Company and the Project; completion of the environmental assessment process; risks related to regulatory and permitting delays; risks related to potential conflicts of interest; the reliance on key personnel; financing, capitalization and liquidity risks including the risk that the financing necessary to fund continued exploration and development activities at the

Project may not be available on satisfactory terms, or at all; the risk of potential dilution through the issuance of additional common shares of the Company; the risk of litigation.

Although the Company has attempted to identify important factors that cause results not to be as anticipated, estimated or intended, there can be no assurance that such forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Accordingly, readers should not place undue reliance on forward-looking information. Forward-looking information is made as of the date of this presentation and the Company does not undertake to update or revise any forward-looking information this is included herein, except in accordance with applicable securities laws.
