Applications for Securities offered pursuant to this Prospectus can only be made by an original Entitlement and Acceptance Form or Shortfall Application Form.

This Prospectus is a transaction specific prospectus for an offer of continuously quoted securities (as defined in the Corporations Act) and has been prepared in accordance with section 713 of the Corporations Act. It does not contain the same level of disclosure as an initial public offering prospectus and is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

Representations contained in this Prospectus are made taking into account that the Company is a disclosing entity for the purposes of the Corporations Act and certain matters are publicly available information or may reasonably be expected to be known to investors and professional advisers whom prospective investors may consult.

Forward-looking statements

This Prospectus contains forward-looking statements which are identified by words such as 'may', 'could', 'believes', 'estimates', 'targets', 'expects', or 'intends' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the Company's management.

The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this Prospectus will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements.

The Company has no intention to update or revise forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this Prospectus, except where required by law.

These forward-looking statements are subject to various risk factors that could cause the Company's actual results to differ materially from the results expressed or anticipated in these statements. These risk factors are set out in Section 5.

Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or

to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Shares these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offer is not being extended and Securities will not be issued to Shareholders with a registered address which is outside Australia or New Zealand.

For further information on overseas Shareholders please refer to Section 2.9.

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Securities.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Please refer to Section 6.2 for further details.

Target Market Determination

In accordance with the design and distribution obligations under the Corporations Act, the Company has determined the target market for the offer of Options issued under this Prospectus. The Company and the Lead Manager will only distribute this Prospectus to those investors who fall within the target market determination (TMD) as set out on the Company's website (www.lepidico.com). By making an application under the Offer, you warrant that you have read and understood the TMD and that you fall within the target market set out in the TMD.

The Company reserves the right not to accept an Application Form from a person if it has reason to believe that when that person was given access to the electronic Application Form, it was not provided together with the electronic Prospectus and any relevant supplementary or replacement prospectus or any of those documents were incomplete or altered.

Company Website

No documents or other information available on the Company's website is incorporated into this Prospectus by reference.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of

potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Securities issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

Definitions and Time

Unless the contrary intention appears or the context otherwise requires, words and phrases contained in this Prospectus have the same meaning and interpretation as given in the Corporations Act and capitalised terms have the meaning given in the Glossary in Section 7.

All references to time in this Prospectus are references to Australian Western Standard Time.

Privacy statement

1.3 Key Risk Factors

Prospective investors should be aware that subscribing for Securities involves a number of risks and an investment in the Company should be considered as highly speculative. The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are set out in Section 5.

The predominant risks relating to the Company and the Offer are summarised below:

1.5 Details of Substantial Holders

Based on publicly available information as at the date of this Prospectus, those persons which (together with their associates) have a relevant interest in 5% or more of the Shares on issue are set out below:

Shareholder	Shares	%
Strategic Metallurgy Holdings Pty Ltd, Strategic Metallurgy Pty Ltd and Gary Johnson ¹	335,358,326	5.15%

Notes:

1. The figures above refer to the interests of Strategic Metallurgy Pty Ltd and Gary Johnson as at the date of this Prospectus. Strategic Metallurgy and Gary Johnson last provided the Company with a Notice of Change of Interest of Substantial Shareholder on 23 June 2021, which confirmed that Strategic Metallurgy Pty Ltd and Gary Johnson held 370,618,485 Shares and voting power of 6.02%.

In the event all Entitlements are accepted there will be no change to the substantial holders on completion of the Offer.

1.6 Lead Manager

Mahe Capital Pty Ltd has been appointed as the lead manager of the Offer. Terms of the lead manager mandate and total fees payable are set out in Section 6.4.2 below.

1.7 Underwriting and sub-underwriting

The Offer is also partially underwritten by Mahe Capital Pty Ltd. Refer to Section 6.4.1 for details of the terms of the underwriting and total fees payable.

No sub-underwriter will increase their shareholding to above 19.9% as a direct result of the issue of Securities under the Offer. Where Shares are issued pursuant to the exercise of New Options, the voting power of the sub-underwriters who exercise their New Options will increase. The likelihood of New Options being exercised is dependent on the price of Shares from time to time until the New Options expire.

1.8 Effect on Control

The Underwriter is presently not a Shareholder and is not a related party of the Company for the purposes of the Corporations Act. The issue of Shares under this Prospectus to the Underwriter may increase its interest in the Company and dilute the Shareholding of other Shareholders to the extent they elect not to participate in the Offer or are ineligible to participate in the Offer.

In accordance with the terms of the Underwriting Agreement, the Underwriter will allocate the Shortfall to its sub-underwriters and/or clients and people who have otherwise agreed to assist with the completion of the Offer such that neither the Underwriter, the sub-underwriters nor any of the Underwriter's clients, individually, will have a voting power in the Company in excess of 19.9% after the issue of the Shortfall.

The Company, in consultation with the Underwriter, will ensure that the Offer (including the equitable dispersion of any Shortfall Securities) complies with the provisions of Chapter 6 of the *Corporations Act 2001* (Cth) and is otherwise

consistent with the policy guidelines contained in ASIC Regulatory Guide 6 and Takeovers Panel Guidance Note 17.

1.9 Potential dilution on non-participating Shareholders

In addition to potential control impacts set out in Section 1.8, Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 9.09% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).

No immediate dilution will occur as a result of the issue of New Options under this Prospectus. However subsequent exercise of any or all of the New Options will result in dilution. Assuming all New Options offered pursuant to this Prospectus are issued and exercised into Shares, Shareholders who do not participate in the Offer, are likely to be diluted by an aggregate of approximately 13.04% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).

For illustrative purposes, the table below shows how the dilution may impact the holdings of Shareholders:

Holder	Holding as at Record date	% at Record Date	Entitlements under the Offer	Holdings if Offer not taken Up	% post Offer
Shareholder 1	100,000,000	1.54%	10,000,000	100,000,000	1.40%
Shareholder 2	50,000,000	0.77%	5,000,000	50,000,000	0.70%
Shareholder 3	25,000,000	0.38%	2,500,000	25,000,000	0.35%
Shareholder 4	10,000,000	0.15%	1,000,000	10,000,000	0.14%
Shareholder 5	1,000,000	0.02%	100,000	1,000,000	0.01%

Notes:

1. This is based on a share capital of 6,507,171,233 Shares as at the date of the Prospectus and assumes no Options currently on issue or other Shares are issued including New Options are exercised.
3. The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted by Eligible Shareholders are placed under the Underwriting and Shortfall Offer. In the event all Entitlements are not accepted and some or all of the resulting Shortfall was not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage.

2.3 Payment options

(a) By BPAY®

For payment by BPAY®, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

You should be aware that your own financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment. **It is your responsibility to ensure that funds submitted through BPAY® are received by 4:00pm (WST) on the Closing Date. The Company shall not be responsible for any delay in the receipt of the BPAY® payment.**

Guidance where you have more than one CRN (Shareholding of Shares)

If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those Shareholdings only use the CRN specific to that Shareholding as set out in the applicable Entitlement and Acceptance Form. **Do not use the same CRN for more than one of your Shareholdings.** This can result in your Application monies being applied to your Entitlement in respect of only one of your Shareholdings (with the result that any Application in respect of your remaining Shareholdings will not be valid).

(b) By Electronic Funds Transfer (overseas applicants)

For payment by Electronic Funds Transfer (EFT) for overseas Eligible Shareholders, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via EFT if you are the

holder of an account that supports EFT transactions to an Australian bank account. Please note that should you choose to pay by EFT:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

(c) **By Cheque**

Payment by cheque or cash will not be accepted.

2.4 Implications of an acceptance

Returning a completed Entitlement and Acceptance Form or paying any Application monies by BPAY® or EFT will be taken to constitute a representation by you that:

- (a) you have received a copy of this Prospectus and the accompanying Entitlement and Acceptance Form, and read them both in their entirety; and
- (b) you acknowledge that once the Entitlement and Acceptance Form is returned, or a BPAY® or EFT payment instruction is given in relation to any Application monies, the application may not be varied or withdrawn except as required by law.

2.5 Minimum subscription

On the basis that the Offer is partially underwritten by the Underwriter to \$4,000,000, the minimum subscription under the Offer is \$4,000,000. No Securities will be issued until the minimum subscription has been received.

If the minimum subscription is not achieved within 4 months after the date of issue of this Prospectus, the Company will either repay the Application monies to the Applicants or issue a supplementary prospectus or replacement prospectus and allow Applicants one month to withdraw their Application and be repaid their Application monies.

2.6 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer. (**Shortfall Securities**). The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.018 being the price at which Shares have been offered under the Offer

If you do not wish to take up any part of your Entitlement you are not required to take any action. That part of your Entitlement not taken up will form part of the Shortfall Offer and potentially be allocated to other Eligible Shareholders or other third parties as part of the Shortfall Offer. The Shortfall Offer will only be available where there is a Shortfall between applications received from Eligible Shareholders and the number of Shares proposed to be issued under the Offer.

Eligible Shareholders (excluding related parties of the Company) who wish to subscribe for Securities above their Entitlement are invited to apply for Shortfall Securities under the Shortfall Offer by completing the appropriate section on their Entitlement and Acceptance Form or by making payment for such Shortfall Securities in accordance with Section 2.3

Allocation of the Shortfall Shares will be at the discretion of the Board in conjunction with the Underwriter and will otherwise be subject to the terms of the Underwriting Agreement, details of which are set out in Section 6.4.1. If the Offer is oversubscribed (by take up of Entitlements and applications for Shortfall Securities by Eligible Shareholders), scale back will be applied to applications under the Shortfall Offer on a pro-rata basis to the respective shareholdings of Eligible Shareholders. There is no guarantee that Eligible Shareholders will receive Securities applied for under the Shortfall Offer.

The Underwriter notes that no Securities will be issued to an applicant under this Prospectus or via the Shortfall Offer if the issue of Securities would contravene the takeover prohibition in section 606 of the Corporations Act. Similarly, no Securities will be issued via the Shortfall Offer to any related parties of the Company.

2.7 ASX listing

Application for Official Quotation of the Securities offered pursuant to this Prospectus will be made within 7 days after the date of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all Application monies for the Shares within the time prescribed under the Corporations Act, without interest.

Application for Official Quotation of the New Options offered pursuant to this Prospectus will also be made within 7 days after the date of this Prospectus. If ASX does not grant Official Quotation of the New Options offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any New Options.

The fact that ASX may grant Official Quotation to the Securities is not to be taken in any way as an indication of the merits of the Company or the Securities now offered for subscription.

2.8 Issue of Securities

Securities issued pursuant to the Offer will be issued in accordance with the ASX Listing Rules and timetable set out at Section 1.

Securities issued pursuant to the Shortfall Offer will be issued on a progressive basis. Where the number of Securities issued is less than the number applied for,

or where no issue is made surplus Application monies will be refunded without any interest to the Applicant as soon as practicable after the closing date of the Shortfall Offer.

Pending the issue of the Securities or payment of refunds pursuant to this Prospectus, all Application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Securities issued under the Offer will be mailed as soon as practicable after the issue of Securities and for Shortfall Securities issued under the Shortfall Offer as soon as practicable after their issue.

2.9 Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Securities these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offer is not being extended and Shares will not be issued to Shareholders with a registered address which is outside Australia or New Zealand.

New Zealand

The Securities are not being offered to the public within New Zealand other than to existing shareholders of the Company with registered addresses in New Zealand to whom the offer of these securities is being made in reliance on the transitional provisions of the Financial Markets Conduct Act 2013 (New Zealand) and the Financial Markets Conduct (Incidental Offers) Exemption Notice 2021 (New Zealand).

This Prospectus has been prepared in compliance with Australian law and has not been registered, filed with or approved by any New Zealand regulatory authority. This document is not a product disclosure statement under New Zealand law and is not required to, and may not, contain all the information that a product disclosure statement under New Zealand law is required to contain.

Nominees and custodians

Nominees and custodians may not submit an Entitlement and Acceptance Form on behalf of any Shareholder resident outside Australia and New Zealand without the prior consent of the Company, taking into account relevant securities law restrictions. Return of a duly completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation that there has been no breach of those regulations.

2.10 Appointment of Nominee

Pursuant to ASX Listing Rule 7.7 of the Corporations Act, the Company has appointed a nominee, Mahe Capital Pty Ltd, to sell the Entitlements to which

Ineligible Shareholders are entitled. The nominee will have the absolute and sole discretion to determine the timing and price at which the Entitlements may be sold and the manner of any such sale.

The proceeds of the sale of these Entitlements will firstly be applied against expenses of such sale, including brokerage, and any balance will accrue to the relevant Ineligible Shareholders as described below.

The net proceeds of the sale of these Entitlements will then be forwarded by the Company as soon as practicable to the Ineligible Shareholders, in proportion to their share of such Entitlements (after deducting brokerage commission and other expenses). If any such net proceeds of sale are less than the reasonable costs that would be incurred by the Company for distributing those proceeds, such proceeds may be retained by the Company.

Notwithstanding that the nominee must sell Entitlements, Ineligible Shareholders may nevertheless receive no net proceeds if the costs of the sale are greater than the sale proceeds. In this regard, the nominee will not be required to sell Ineligible Shareholders' Entitlements at a particular price.

Shareholders resident in Australia or New Zealand holding Securities on behalf of persons who are resident overseas are responsible for ensuring that taking up an Entitlement under the Offer does not breach regulations in the relevant overseas jurisdiction. Return of a duly completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation that there has been no breach of those regulations.

3. PURPOSE AND EFFECT OF THE OFFER

3.1 Purpose of the Offer

The purpose of the Offer is to raise up to \$11,712,945 before costs.

The funds raised from the Offer are intended to be applied in accordance with the table set out below:

Item	Proceeds of the Offer	Minimum Subscription (\$)	%	Full Subscription (\$)	%
Phase 1 Project – Development					
1.	Completion of FEED	1,000,000	25%	1,000,000	9%
2.	Completion of lender due diligence	800,000	20%	800,000	7%

4.	Helikon 2-3 Mineral Resource upgrade	500,000	12%	500,000	4%
Other					
5.	Working capital	1,276,066 ¹	32%	3,900,176 ²	33%
6.	Expenses of the Offer ²	423,934	11%	512,769	4%
	Total	4,000,000	100%	11,712,945	100%

Notes:

1. Working capital will be allocated as follows (based on the Minimum Subscription):

Salary and Wages	\$546,622
Office & General	\$484,455
Business Development	\$244,989
	<u>\$1,276,066</u>

2. Working capital will be allocated as follows (based on the Full Subscription):

Salary and Wages	\$1,670,698
Office & General	\$1,480,692
Business Development	\$ 748,786
	<u>\$3,900,176</u>

3. Refer to Section 6.8 for further details relating to the estimated expenses of the Offer.

If only the Minimum Subscription is raised under the Offer, then the amount allocated to the completion of FEED and lender due diligence and the Helikon 2-3 Mineral Resource upgrade are not expected to change. However, the Company will reduce the amount of funds allocated to the chemical plant and concentrator stage 2 EPCM works and working capital by the amount of the difference between the amount raised and the Minimum Subscription.

On completion of the Offer, the Board believes the Company will have sufficient working capital to achieve its stated objectives. In the event the Offer is not fully subscribed, operational objectives are likely to be modified, which may result in delay or substantial changes to the Company's future plans. In this event (and after accounting for associated Offer costs) it is likely that the Company will appropriate scale back funds available for chemical plant and concentrator stage 2 EPCM works.

In addition, it should be noted that the Company's budgets and forecasts will be subject to modification on an ongoing basis depending on the results achieved from its business activities and operations.

The above table is a statement of current intentions as of the date of this Prospectus. As with any budget, intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way funds are applied on this basis.

The principal effect of the Offer, assuming all Entitlements are accepted and no Shares are issued including on exercise or conversion of other Securities on issue prior to the Record Date, will be to:

4. RIGHTS AND LIABILITIES ATTACHING TO SECURITIES

4.1 Rights and liabilities attaching to Shares

The following is a summary of the more significant rights and liabilities attaching to Shares being offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) General meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i)** each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii)** on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii)** on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) Dividend rights

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of Securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

5. RISK FACTORS

5.1 Introduction

The Securities offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Directors strongly recommend that prospective investors consider the risk factors set out in this Section 5, together with all other information contained in this Prospectus.

The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 5, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Securities. This Section 5 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

Before determining whether to invest in the Company you should ensure that you have a sufficient understanding of the risks described in this Section 5 and all of the other information set out in this Prospectus and consider whether an investment in the Company is suitable for you, taking into account your objectives, financial situation and needs.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

5.2 Company specific

Risk Category	Risk
Potential for dilution	<p>In addition to potential control impacts set out in Section 1.8, Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 9.09% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).</p> <p>It is not possible to predict what the value of the Company, a Share will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.</p> <p>The last trading price of Shares on ASX prior to the Prospectus being lodged of \$0.022 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offer.</p>
Additional requirements for capital	<p>The Company's capital requirements depend on numerous factors. The development of the Phase 1 Project is dependent on the Company's ability to secure further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and</p>

Risk Category	Risk
	<p>operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.</p> <p>The Company will need to raise additional capital to fund the development of the integrated Phase 1 Chemical Plant. The decision on how and when the Company will raise future capital will largely depend on the market conditions existing at that time.</p>
<p>L-Max[®] Technology Risk</p>	<p>The L-Max[®] Technology is a new process that has only been tested at a demonstration pilot scale. The technology has not been scaled up and tested and may not be technically feasible, may not perform the process as it was designed, may prove uneconomic, unreliable and may not be developed on a timely basis.</p> <p>Competition in retaining and sustaining protection of intellectual property and the complex nature of intellectual property can lead to expensive and lengthy patent disputes for which there can be no guaranteed outcome.</p> <p>The L-Max[®] Technology is a proprietary process that is the subject of a granted USA, Australian, European and Japanese patent, Australian Innovation Patent and a number of patent applications across several countries.</p> <p>Although the Company is not aware of any third party interests in relation to the L-Max[®] Technology, there is always a risk of third parties claiming involvement in technological discoveries, and if any disputes arise, they could adversely affect the Company.</p> <p>Although the Company will implement all reasonable endeavours to protect its L-Max[®] Technology, there can be no assurance that these measures have been, or will be sufficient.</p>
<p>LOH-Max[®] Technology Risk</p>	<p>The LOH-Max[®] Technology is a new process that has only been tested at pilot scale. The technology has not been scaled up and may not be technically feasible, may not perform the process as it was designed, may prove uneconomic, unreliable and may not be developed on a timely basis.</p> <p>Competition in retaining and sustaining protection of intellectual property and the complex nature of intellectual property can lead to expensive and lengthy patent disputes for which there can be no guaranteed outcome.</p> <p>The LOH-Max[®] Technology is a proprietary process that the Company acquired on 25 November 2020 and is the subject of a number of patent applications across several countries. In addition to a cash payment of \$10,000 the vendors will be entitled to a trailing royalty in relation to any third party LOH-Max[®] licences entered into by the Lepidico Group after 1 January 2021.</p> <p>Although the Company is not aware of any third party interests in relation to the LOH-Max[®] Technology, there is always a risk of third parties claiming involvement in technological discoveries, and if any disputes arise, they could adversely affect the Company.</p> <p>Although the Company will implement all reasonable endeavours to protect the LOH-Max[®] Technology, there can be no assurance that these measures have been or will be sufficient.</p>

Risk Category	Risk
<p>Going Concern</p>	<p>The Company's Annual Financial Report for the Financial Year ended 30 June 2022, and released on 23 September 2022, (Annual Report) includes a note on the financial condition of the Company and notes that the ability of the Group to continue as a going concern is dependent on the Company being able to continue to raise additional funds as required to meet ongoing exploration and development programs and working capital.</p> <p>The Annual report states: <i>For the year ended 30 June 2022, the Group incurred a net loss after tax of \$7,941,340 and a net cash outflow from operations of \$5,482,547. At 30 June 2022, the Company had net current assets of \$1,189,277.</i></p> <p>The Directors believe that upon the successful completion of the Offer, the Company will have sufficient funds to adequately meet the Company's current exploration commitments, ongoing development programs and short-term working capital requirements. However, it is highly likely that further funding will be required to meet the medium to long-term working capital costs of the Company.</p> <p>In the event that the Offer is not completed successfully there is significant uncertainty as to whether the Company can continue as a going concern which is likely to have a material adverse effect on the Company's activities.</p>
<p>Non-binding Arrangements</p>	<p>The Company has entered into multiple non-binding arrangements with various parties under non-disclosure agreements. The purpose of the non-binding arrangements is to summarise the current status and understanding of discussions at that point in time. Whilst these discussions are ongoing, no binding offtake arrangements have been entered into.</p> <p>The terms of any binding arrangements that may result from non-binding term sheets or letters of intent may vary significantly from those originally contemplated or may not eventuate at all.</p>
<p>Licensing of Technology</p>	<p>The Company has entered into binding licencing arrangements for its L-Max[®] and LOH-Max[®] Processes. The Company will only receive a monetary gain from those arrangements if the licensee is able to effectively commercialise the L-Max[®] and LOH-Max[®] Processes. There is a risk of poor licensee strategy or execution which may impact the success of the L-Max[®] and LOH-Max[®] Processes on third party deposits.</p> <p>A dispute over the licencing arrangements between the Company and the licensees may result in costly legal fees.</p>
<p>Jinhui Offtake Agreement</p>	<p>Desert Lion Energy Inc (Desert Lion), which holds an 80% interest in the Karibib project in Namibia (Karibib Project), was acquired by the Company on 11 July 2019.</p> <p>Desert Lion received a prepayment of US\$4.5 million (the Deposit) from Jiangxi Jinhui Lithium Co Ltd (Jinhui), a private Chinese corporation under an offtake agreement dated 6 November 2017, as amended (the Jinhui Lithium Offtake Agreement). The Jinhui Lithium Offtake Agreement provides for the sale of certain low-grade lepidolite concentrate material and lepidolite concentrate located in the stockpile at the Karibib Project.</p> <p>The Jinhui Lithium Offtake Agreement became effective on 16 November 2017 and ends on the earlier of 60 months following such date (being 16 November 2022) and the date that is 15</p>

Risk Category	Risk
	<p>business days after all concentrate produced from the stockpiled material has been loaded on to the vessel nominated by Jinhui and has been paid for by Jinhui.</p> <p>Following the completion of the first shipment by Desert Lion on 24 April 2018, the Agreement came into full force and effect with no specific mechanism for return of the Deposit. The remaining balance of the Deposit was to continue to amortize against any future shipments of the stockpile material without accruing interest.</p> <p>On 31 August 2018, Desert Lion announced it had ceased all operations in Namibia and commenced negotiations with Jinhui to amend the pricing metrics under the Jinhui Lithium Offtake Agreement.</p> <p>Following the Company's acquisition of Desert Lion, the Company has continued to engage with Jinhui with respect to amending various terms of the Jinhui Lithium Offtake Agreement including extending its term, revising the pricing structure and/or terminating the agreement. The parties continue to discuss a mutually beneficial outcome.</p>
<p>No profit to date and uncertainty of future profitability</p>	<p>Lepidico has incurred losses in the past and it is therefore not possible to evaluate the Company's future prospects based on past performance. Lepidico expects to make losses in the foreseeable future even though its proprietary process technologies might become commercialised. Factors that will determine Lepidico's future profitability are its ability to manage its costs, its ability to execute its development and growth strategies in relation to both exploration and its process technologies, the success of its activities in a competitive market, the actions of competitors and regulatory developments. As a result, the extent of future profits, if any, and the time required to achieve sustainable profitability, is uncertain. In addition, the level of any such future profitability (or loss) cannot be predicted.</p>
<p>Definitive Feasibility Study results</p>	<p>The Company completed a definitive feasibility study (DFS) for a Phase 1 Project with a chemical plant located in Abu Dhabi, as well as two mines and a concentrator located in Namibia in May 2020. However, the DFS contains statements that are only predictions, based on certain assumptions and involve known and unknown risks, uncertainties and other factors, many of which are beyond Lepidico's control. Actual events or results may differ materially from the events or results expected or implied in any forward-looking statement contained in the DFS. The inclusion of such statements in the DFS should not be regarded as a representation, warranty or prediction with respect to the accuracy of the underlying assumptions or that any forward-looking statements will be or are likely to be fulfilled. Lepidico undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date of the DFS (subject to securities exchange disclosure requirements). The information in the DFS does not take into account the objectives, financial situation or particular needs of any person. Nothing contained in this announcement constitutes investment, legal, tax or other advice.</p> <p>There can be no assurance that statements made in the DFS will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Refer Risk Factor: Increases in capital and operating costs below.</p>

Risk Category	Risk
Pilot Plant limited operation	<p>The Company has operated four pilot plants. Most recently a demonstration scale L-Max[®] plant and LOH-Max[®] pilot plant was operated in four phases between November 2021 and July 2022. Approximately 8 tonnes of concentrate grading 3.7% Li₂O, sourced from Karibib was processed in continuous operation through the L-Max[®] leach and impurity removal circuits. The trial involved flexing operating parameters to identify and quantify operational sensitivities to variations in process conditions. This in turn led to several Phase 1 design revisions being implemented. The trial culminated in a period of steady state operation. Subsequent campaigns were undertaken to produce lithium hydroxide via the LOH-Max circuit and potassium, rubidium and caesium sulphates via a separate by-product circuit.</p> <p>Reports were provided by Strategic Metallurgy on the L-Max[®] and LOH-Max[®] campaigns, which were subsequently independently reviewed by Behre Dolbear Australia Pty Ltd (BDA) on behalf of prospective Project lenders. Reports for lithium hydroxide refining and by-product manufacture are pending receipt of data from external sources.</p> <p>The demonstration scale pilot has only been operated for one campaign and may not perform the process as it was designed for any subsequent campaigns or at larger scale.</p>
Research and Development	<p>The Company can make no representation that any of its research into or development of the Company's lithium technologies will be successful, that the development milestones will be achieved, or that the Technologies will be developed into products that are commercially exploitable.</p> <p>There are many risks inherent in the development of technology products, particularly where the products are in the early stages of development. Projects can be delayed or fail to demonstrate any benefit, or research may cease to be viable for a range of scientific and commercial reasons.</p>
Government licences and approvals	<p>Lepidico through its direct and indirect participation in corporations, partnerships or joint ventures has interests in properties in Namibia. Operations may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on production, price controls, export controls, foreign currency remittance, income taxes, expropriation of property, foreign investment, maintenance of claims, environmental legislation, land use, land claims of local people, water use and mine safety.</p> <p>Failure to comply strictly with applicable laws, regulations and local practices relating to mineral rights applications and tenure, could result in loss, reduction or expropriation of entitlements. Outcome in courts in other jurisdictions may be less predictable than in Australia, which could affect the enforceability of contracts entered into.</p> <p>The occurrence of these various factors and uncertainties cannot be accurately predicted and could have an adverse effect on the operations of Lepidico. Lepidico has made its investment and strategic decisions based on the information currently available to the Directors, however, should there be any material change in the political, economic, legal and social environments in UAE, and Namibia the Directors may reassess investment decisions and commitments to assets in these jurisdictions.</p>

Risk Category	Risk
Conflicts of Interest	Certain directors and officers of the Company are, and may continue to be, involved in the mining and mineral exploration industry through their direct and indirect participation in corporations, partnerships or joint ventures. Situations may arise where the other interests of these Directors and officers may conflict with the interests of the Company. Directors and officers of the Company with conflicts of interest will be subject to and are required to follow the procedures set out in applicable corporate and securities legislation, regulations, rules and policies.
Management of growth	The ability of Lepidico to implement its strategy requires effective planning and management control systems. Lepidico's plans may place a significant strain on the Company's management, operational, financial and personnel resources. The Company's future growth and prospects will depend on its ability to manage this growth and to continue to expand and improve operational, financial and management information and quality control systems on a timely basis, whilst at the same time maintaining effective cost controls. Any failure to expand and improve operational, financial and management information and quality control systems in line with the Company's growth could have a material adverse effect on the Company's business, financial condition and results of operations.
New project risk	As part of its business strategy, the Company may evaluate new business opportunities and make acquisitions of or significant investments in other resource or non-resource projects. Projects may be located in Australia or overseas. Should a suitable new business opportunity be identified, it will then need to be assessed for its technical, legal and commercial suitability. There is no guarantee that any proposed acquisition of a new business or project will be completed or will be successful. Identification and evaluation of a business opportunity or a project can take considerable time and consume significant cash resources.
Increases in capital and operating costs	The actual capital and operating costs could be significantly higher than the estimates, particularly if there are material changes in project scope or delays to the construction of the Phase 1 Chemical Plant or significant movements in inflationary factors. There can be no assurance that actual capital costs and operating costs will be as estimated in the DFS.
Coronavirus (COVID-19)	<p>The coronavirus disease (COVID-19) is impacting global markets. The nature and extent of the effect of the disease on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by economic impacts and uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.</p> <p>The Directors are monitoring the situation closely and have considered the impact of COVID-19 on the Company's business and financial performance. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain. In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to the impact of COVID-19 on its revenue channels and any adverse impact on the Company. If any of these impacts appear material</p>

5.3 Industry specific

Risk Category	Risk
International operations	<p>Any potential future operations of Lepidico in overseas jurisdictions are subject to a number of risks, including:</p> <ul style="list-style-type: none"> (a) geo-politics associated with competition for critical minerals that could impact financing and product supply arrangements; (b) potential difficulties in enforcing agreements and collecting receivables through foreign local systems; (c) potential difficulties in protecting rights and interests in assets; and (d) restrictive governmental actions, such as imposition of trade quotas, tariffs and other taxes. <p>any of these factors could materially and adversely affect Lepidico's business, results of operations and financial condition.</p>
Exploration, geological and development risks	<p>Mineral exploration and development are speculative and high risk activities that requires large amounts of expenditure over extended periods of time and may be impeded by circumstances and factors beyond Lepidico's control. The Company's ability to succeed in these practices involves (amongst other things):</p> <ul style="list-style-type: none"> (a) discovery and proving-up, or acquiring, an economically recoverable mineral resource or reserve; (b) access to adequate capital throughout the acquisition/discovery and project development phases of a mineral exploration project; (c) securing and maintaining title to such mineral exploration projects; (d) obtaining required development consents and approvals necessary for the acquisition, exploration, development and production phases of the project; and (e) accessing the necessary experienced operational staff, the applicable financial management and recruiting skilled contractors, consultants and employees. <p>There can be no assurance that forthcoming exploration programmes, or subsequent exploration programmes, will result in the realisation of the Company's objectives such as the discovery of an economic mineral resource. Even if an apparently viable mineral resource is identified, there is no guarantee that it can be economically exploited. Further, conclusions drawn during mineral exploration are subject to the uncertainties associated with all sampling techniques and to the risk of incorrect interpretation or geological, geochemical, geophysical, drilling and other data.</p>
Operational and technical risks	<p>The operations of the Company may be affected by various factors, including but not limited to:</p> <ul style="list-style-type: none"> (a) Failure to locate or identify mineral deposits;

Risk Category	Risk
	<ul style="list-style-type: none"> (b) Failure to achieve predicted grades and tonnes in exploration and mining; (c) Operational and technical difficulties encountered in mining; (d) Insufficient or unreliable infrastructure, such as power, water and transport; (e) Difficulties in commissioning and operating plant and equipment; (f) Mechanical failure or plant breakdown; (g) Unanticipated metallurgical problems which may affect extraction costs; (h) Adverse weather conditions; (i) Industrial and environmental accidents; (j) Industrial disputes and labour shortages; and (k) Unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.
<p>Commodity price fluctuations</p>	<p>The Company is seeking to develop projects which will be reliant on the prices of various commodities including lithium chemicals and various by-products. Lithium chemicals are considered to be specialty industrial chemicals and the sales prices for the different lithium compounds are not public. Lithium chemicals are not traded commodities like base and precious metals. Therefore, it is possible that the sales prices used in the Definitive Feasibility Study will be different than the actual prices at which the Company is able to sell its lithium compounds. Commodity and product prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include foreign currency fluctuation, worldwide and regional supply and demand for commodities and chemicals, industrial disruption, forward selling by producers and production cost levels, general world economic conditions and the outlook for interest rates, inflation and other economic factors on both a regional and global basis. These factors may have a positive or negative effect on the Company's exploration, project development and production plans and activities, together with the ability to fund those plans and activities.</p>
<p>Lithium, Caesium and Rubidium Demand</p>	<p>There are a limited number of producers of lithium, caesium and rubidium compounds and it is possible that those existing producers will try to prevent new-comers from entering the chain of supply by increasing their production capacity, lowering sales prices and/or through establishing contractual terms with consumers that make the market more challenging for new producers.</p> <p>The Company intends to produce lithium hydroxide monohydrate to be used in the making of cathodes for rechargeable batteries and certain other industrial uses. If cathode manufacturers use less lithium chemical than expected, or if the demand for rechargeable batteries, mainly used in electric and hybrid vehicles, is less than forecasted, it could have a material adverse effect on the sales price, profitability and development strategy of the Company.</p>

Risk Category	Risk
	In addition, the commercialisation of new technology carries the risk that, at any stage, of development it may be deemed uncommercial for a variety of reasons, including the development of newer and better technologies. A decrease in the demand for lithium, by virtue of technological displacement, would have a significant impact on the Company's business model, operating results and financial position.
Title Risk	Interests in exploration licences are governed by the national legislation in the relevant jurisdiction. The licences which grant the title to each property are subject to compliance with certain requirements, including lodgement of reports, payment of royalties and compliance with environmental conditions and environmental legislation. Consequently, as is the case in Australia, Lepidico runs the risk of incurring penalties or loss of title to or its interest in its licences if these requirements are not met.
Joint venture parties, contractors and agents	<p>In conducting its business, the Company relies on continuing existing strategic relationships and has been forming new relationships with other entities in the mineral exploration and mining industry, including joint venture partners, contractors and agents. There can be no assurance that existing relationships will continue to be maintained or that new ones will be successfully formed and the Company could be materially adversely affected by changes to such relationships or difficulties in forming new ones.</p> <p>The Directors are unable to predict the risk of financial failure or default by a participant in any joint venture to which the Company is, or may become a party, or insolvency or other managerial failure by any of the contractors used by the Company in any of its activities, or insolvency or other managerial failure by any of the other service providers used by the Company for any activity.</p>
Environmental risk	Lepidico's operations will be subject to various regulations regarding environmental matters. Development of each of Lepidico's projects will be dependent on the relevant licences meeting environmental guidelines and gaining approvals by government authorities. Whilst Lepidico intends to conduct its activities in an environmentally responsible manner, risks arise in relation to compliance with these regulations and approvals.
Unforeseen expenditure risk	Expenditure may need to be incurred that has not been taken into account in the preparation of this Prospectus. If such expenditure is subsequently incurred, this may adversely affect the expenditure proposals by Lepidico.
Competition	The industry in which the Company will be involved is subject to domestic and global competition. While the Company will undertake reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, whose activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and businesses.

5.4 General risks

Risk Category	Risk
Economic	General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production

Risk Category	Risk
	activities, as well as on its ability to fund those activities.
Market conditions	<p>Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities. <p>The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p> <p>In addition, the extent of the effects of COVID-19 is at this stage uncertain and continuing to evolve. The COVID-19 pandemic is having, and is expected to continue to have, a significant influence on the volatility of equity markets generally and may continue to impact and influence the value of the Company's quoted securities.</p>
Litigation risks	<p>The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position.</p> <p>The Company is not currently engaged in any litigation.</p>
Currency risk	<p>The Company's operations currently incur expenditures in various currencies. As a result of the use of different currencies, the Company is subject to foreign currency fluctuations which may materially affect its business, results of operations and financial condition.</p>
Governmental policy changes and legal risk	<p>Government action or policy change in relation to access to lands and infrastructure, compliance with environmental regulations, export restrictions, taxation, royalties and subsidies may adversely affect Lepidico's operations and financial performance.</p> <p>The Lepidico projects will be governed by a series of laws and regulations. Breaches of non-compliance with these laws and regulations can result in penalties and other liabilities. These may have a material adverse impact on the financial position, financial performance, cash flows, growth prospects and share price of Lepidico.</p> <p>These laws and regulations may be amended from time to time, which may also have a material adverse impact on the financial position, financial performance, cash flows, growth prospects and share price for Lepidico. The legal and political conditions and any</p>

Risk Category	Risk
	<p>changes thereto are outside the control of Lepidico.</p> <p>The introduction of new legislation or amendments to existing legislation by government, developments in existing common law, or the respective interpretation of the legal requirements in any of the legal jurisdictions which govern Lepidico's operations or contractual obligations, could impact adversely on the assets, operations and, ultimately, the financial performance of Lepidico and the value of its Shares.</p>
Dividends	<p>Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.</p>
Taxation	<p>The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.</p> <p>To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Securities under this Prospectus.</p>
Credit risk	<p>Credit risk refers to the risk that a counter-party will default on its contractual obligations resulting in financial loss to the consolidated entity. The Company has adopted the policy of only dealing with creditworthy counter-parties and obtaining sufficient collateral or other security where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company measures credit risk on a fair value basis. The Company does not have any significant credit risk exposure to any single counter-party.</p> <p>As noted in the Annual Report, the group's cash and cash equivalents are held with HSBC Bank and First National Bank Namibia, and management consider the group's exposure to credit risk is low.</p>
Liquidity Risk	<p>Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The Company manages liquidity risk by maintaining adequate cash reserves from funds raised in the market and by continuously monitoring forecast and actual cash flows.</p> <p>Typically, the Group ensures it has sufficient cash on demand to meet expected expenditures, including servicing financial obligations; this excludes the potential impact of extreme circumstances that cannot be reasonably predicted, such as the COVID-19 pandemic.</p>
Reliance on key personnel	<p>The ongoing responsibility of overseeing the day-to-day operations and the strategic management of Lepidico will depend substantially on its senior management and its key personnel,</p>

Risk Category	Risk
	<p>especially as it relates to administration, exploration and proprietary process technologies.</p> <p>There can be no assurance given that there will be no detrimental impact on Lepidico if one or more of these personnel cease their employment.</p>
<p>Economic conditions and other global or national issues</p>	<p>General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, currency exchange controls and rates, national and international political circumstances (including outbreaks in international hostilities, wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder, and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics, may have an adverse effect on the Company's operations and financial performance, including the Company's exploration, development and production activities, as well as on its ability to fund those activities.</p> <p>General economic conditions may also affect the value of the Company and its market valuation regardless of its actual performance.</p> <p>Specifically, it should be noted that the current evolving conflict between Ukraine and Russia is impacting global macroeconomics and markets generally.
